

6/27/00

To FDA:

I am opposed to your proposal to make birth control available over the counter w/out a doctors prescription. In fact, I am opposed to birth control as morally wrong or to put it another way, just plain wrong.

Just because something can be done, does not mean it should be done. Science, technology, and medicine must bow to or submit to a higher power such as ethics and morality or to put it another way, what is right and what is wrong.

Sincerely,  
Daneel J. McCarthy
